1. INTRODUCTION

The Web Technology project of creating website for a store specializing in watches involves designing and developing the static interface of an e-commerce website. For the designing phase, a designing tool named 'Balsamiq' is used to create a wireframe for the design of webpages in the website. For the development phase, modern web technologies like HTML5, CSS and JavaScript are used.

1.1. Goals and Objectives

The project aims for development of skills for frontend development. The goal of the project is to create a static website by designing the UI design, creating a clear website structure, designing a responsive layout and creating a visual and interactive design for better User Experience. The project also enhances the understanding about fundamental Internet technologies, website designing principles, website's development phase, scripting languages and it's usability.

1.2. HTML

Figure 1 - HTML icon

HTML stands for Hypertext Markup Language. It is basic building block of the web which gives structure to the webpage and meaning of the web content (Mozilla Corporation, 2024). The project is done using HTML5 semantic layout. The information in webpage is document type. English is used as language of webpage. Head tag encloses meta tag, title tag, style tag, script tag and link tag. Body tag encloses header tag where navigation bar is inserted, main tag which is collection of section tags which has

main content of the specific webpage and a footer tag. The whole html code is in html tag.

Some other majorly used HTML tags in the webpage are div tag. Div tag is not semantic element which is used in the website for designing aspect. Image tag is also the most used tag in the website. All the images in the website is added with the help of img tag. Class attribute with div is used in most of the sections and using it, CSS properties are embedded. Heading tags are used in necessary places to highlight

importance of the title in website. Paragraph tag is used in most places for proper management of text.

1.3. CSS

Figure II - CSS icon

CSS stands for Cascading Style Sheets. It is a stylesheet language which describes how the elements of HTML should be styled and rendered on the screen (Mozilla Corporation, 2024). In the project, Inline CSS, Internal CSS and External CSS are used. When the styling is required for specific element for once in the webpage, inline CSS is used. When styling is required for the specific elements used throughout the webpage, internal CSS is used. When multiple webpages required

same styling, external CSS is used.

Some majorly used CSS property in the website are margin for creating space outside element, padding for creating space inside element, display: flex for arranging items in row structure, border- shadow for creating shadow effect. CSS embedding in the website has made the website more engaging.

1.4. JavaScript

Figure III - JavaScript icon

JavaScript is the popularly known scripting lightweight interpreted programming language used for making our webpages interactive and dynamic (Mozilla Corporation, 2025). In the project, JavaScript is used in different place for making website more engaging and dynamic. Form validation through JavaScript is done in about us page. The JavaScript embedding is done through on click attribute of html tags. JavaScript functions are created using JavaScript. These functions gave a life to the website.

During implementation of javascript, prompt, alert, function, var keyword, if else statement are used.

1.5. Verdict

The project overall boosts the skills regarding HTML, CSS, and JavaScript. It develops the basic idea on designing and foremost framework which should be done at the starting of development of project. It focuses on formation of a static website using HTML, CSS with some dynamic feature using JavaScript for little user interactivity. The main goal or the objective of the project is frontend development of an e-commerce website specializing in watches.

2. Discussion and Analysis

For the foremost designing of website, formation of wireframes are done using GUI (Graphical User Interface) design tool called Balsamiq. For writing codes of HTML, CSS and JavaScript, code editor popularly known as VS Code is used.

2.1. Visual Studio Code

Figure IV - VS code icon

The text editor used for development of the project is Visual Studio Code. It is commonly known as VS Code. Visual Studio Code is a lightweight but powerful and fastest IDE (Integrated Development Environment) used to edit, build and debug code which also facilitates in-app compiler for faster coding (Microsoft Corporation, n.d.). For the project, extensions like HTML Boilerplate and Live server of VS Code were used which made coding much easier and faster.

2.2. Balsamiq

Figure V - Balsamiq icon

The tool used for developing wireframe in the project is Balsamiq. Balsamiq is the wireframing tool used for building the design of the ideas clearly in short period of time which helps in quick communication/ sharing of the vision and staying focused in the project goals (Balsamiq, n.d.). In the project, Balsamiq is used to give shape and design for the

website before the website development. It helped in giving clear basic idea of where to start coding from. It worked as a visual guide in the project.

2.3. Colour Palette

At the starting of project, foremost thing done was choosing the colour palette for the website. The colour palette used in project is:

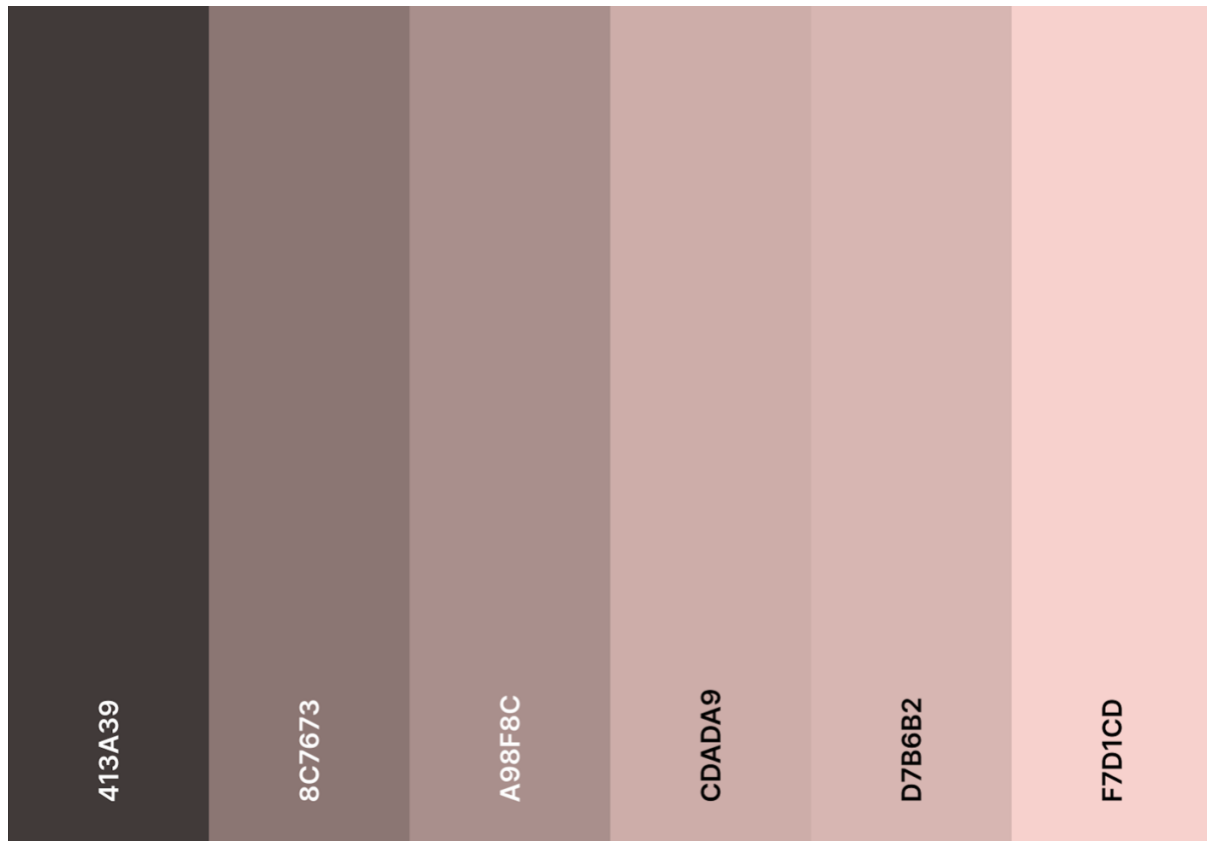

Figure VI -Colour Palette

The text colour in the website is #413A39. The navigation bar and footer uses #CDADA9. A JS function is made which changes background colour when button is clicked. The background colour in which it is converted is #A98F8C. In product description page, to make customer reviews, #D7B6B2 and #F7D1CD is used. In research page, #D7B6B2 and #8C7673 is used for design. Entire website is made with these colours and primary colours i.e. black and white.

2.4. Wireframe and Webpage

In the project, wireframes are made at the early development phase for developing webpages. Wireframe and webpage screenshots with information regarding some development process are documented.

2.4.1. Header and Footer

Header and footer are the common section which is used in entire website.

Header:

Header has the logo of time treasure aligned at the center. And the navigation bar which helps to navigate all around the webpages. Home, Product, About Us, Research and Blog are quick links given at the navigation bar.

Figure VII - Header of website

Footer:

The footer of the website is referenced from a learning platform called GFC Global. The minimalist design of footer made it more appealing to use it in the project. The 3 columns in footer is kept in 3 divs. These 3 divs are enclosed in one div called footer. 'display: flex' property of CSS is used in footer div to make the alignment in row. Like footer div, footcont div is created. In which socialmedia div containing image of facebook and instagram which can direct link to respective page and mode div containing button to change background color of webpage is made.

Figure VIII - Footer of website

2.4.2. Home Page

The main section of this homepage includes several sections aimed at engaging visitors with Time Treasure's watches. The first major section is the image slider at the top of the page. This is implemented in HTML with the `<img>` tag inside a `<div>` container. JavaScript is used to cycle through an array of images creating a dynamic experience for the user.

Below the image slider, the page showcases Top Selling Watches, which is styled with CSS for a clean and organized layout. The products are displayed side by side with equal spacing. The button in it links to a product description page.

The page further has sections like "Get to know us", "Trend of Watches", and "How the project was built", all of which has toggling image. The image can be toggled between two different images. At end, there is top collection section with images having hover effects.

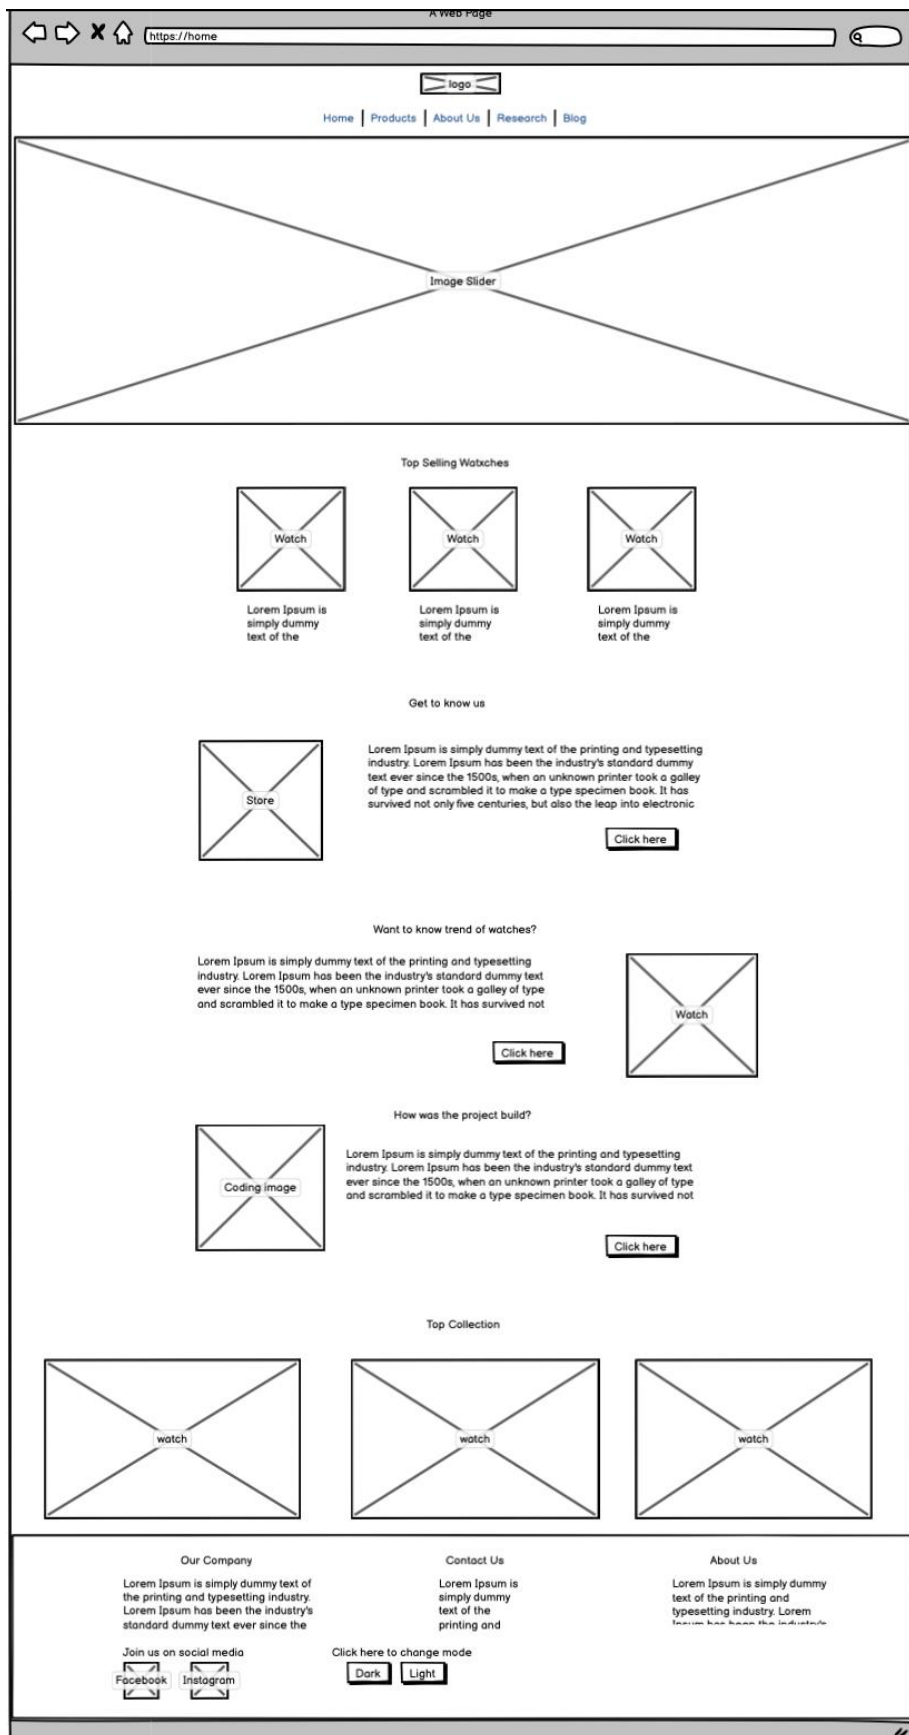

Figure IX - Wireframe of Home Page

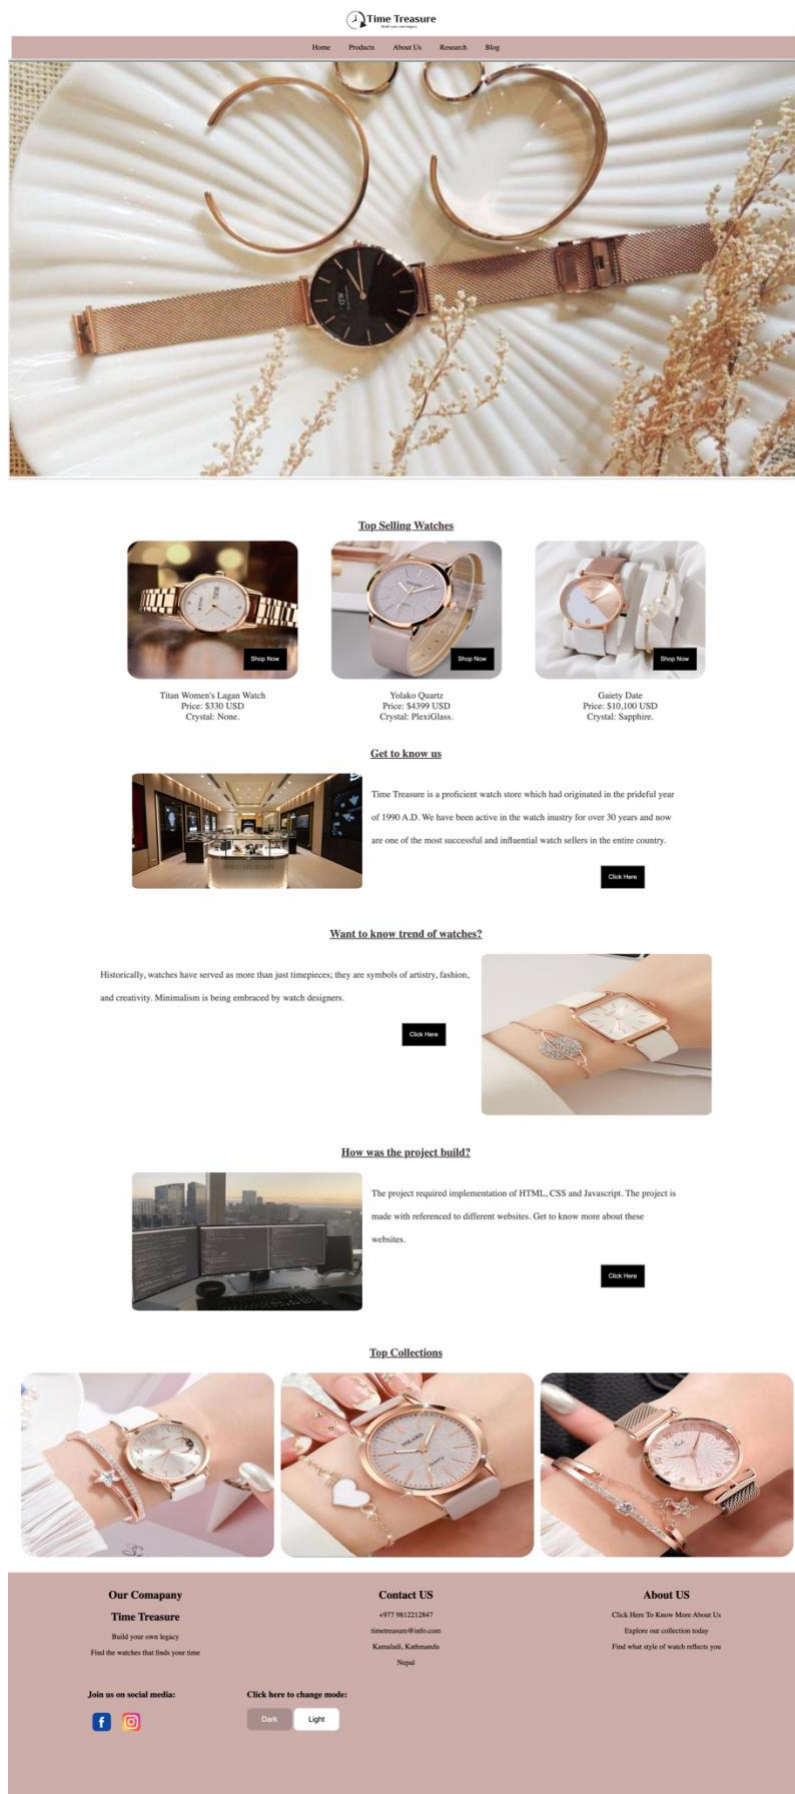

Figure X - Home Page

2.4.3. Product Page

The main section of the product page is dedicated to showcasing a collection of aesthetic watches available for purchase. The products are placed inside a container `<div class="container">`. Each products row is enclosed within a `<div class="prod">`, `<div class="prod2">`, `<div class="prod3">`, or `<div class="prod4">`. The products include `<img>` tags to display the product images and `<p>` tags to show their descriptions. Each product has a Shop Now button implemented with the `<button>` tag, styled with classes like `btn1`, `btn2`, etc, which link to individual product detail pages.

2.4.4. Product Description Page

The main section of this product description page provides a detailed overview of the specific watch. The main section is organized into multiple sections for a structured user experience. The first part of the main section is the overview which showcases an image of the product alongside key details of the product. A "BUY NOW" button is linked to a JavaScript function `buy()`, which prompts the user to enter their name to proceed with the purchase. Also, a star rating is linked to navigate to review section.

The second part is the detail section which has two primary sub divs layouted using `display: flex`. One for information presented in a table format and other for the product's detailed description. The recommendation section is to suggest for some other products which also used `display: flex` for layout. It has pictures and text enclosed in anchor tag which lead to description page of other product.

Finally, review section is for customers to know people's view on the product and submit their reviews on the product. It also displays customer feedback in a tabular form with ratings which is made using color-coded bars. JavaScript function `review()` is used so user can write their reviews.

14

2.4.5. Research Page

The main section of this research page is divided into multiple sections that visually present key information about how research influenced the development of our website. The first section, `research-top`, introduces the concept of research with a large div container that divides the layout into two parts: an image (showing a product) and a text section that explains the importance of research. The `top1` class defines the image container, and the `top2` class defines the text container with properties like `margin-top`, `line-height`, and specific layout adjustments to ensure both sections are aligned neatly. There are sections which uses the `display: flex` property to ensure that the image and text content are aligned side by side.

There are multiple sections that compare our website elements with it's referenced website, demonstrating how research has been applied. In the `reference` class, images are displayed using `display: flex` with descriptive text. Each image is enclosed in anchor tags that link to the reference websites and in our website for user exploration. The `text` class is used to apply a box-shadow effect for visually appealing layout. The images themselves are styled with a `border-radius` for rounded corners and a hover effect is added for dynamic visual touch.

Finally, the last section of the page, `end`, provides a summary of the research process. The layout uses a flexbox container to split the section into two parts: an image on the left and a text block on the right.

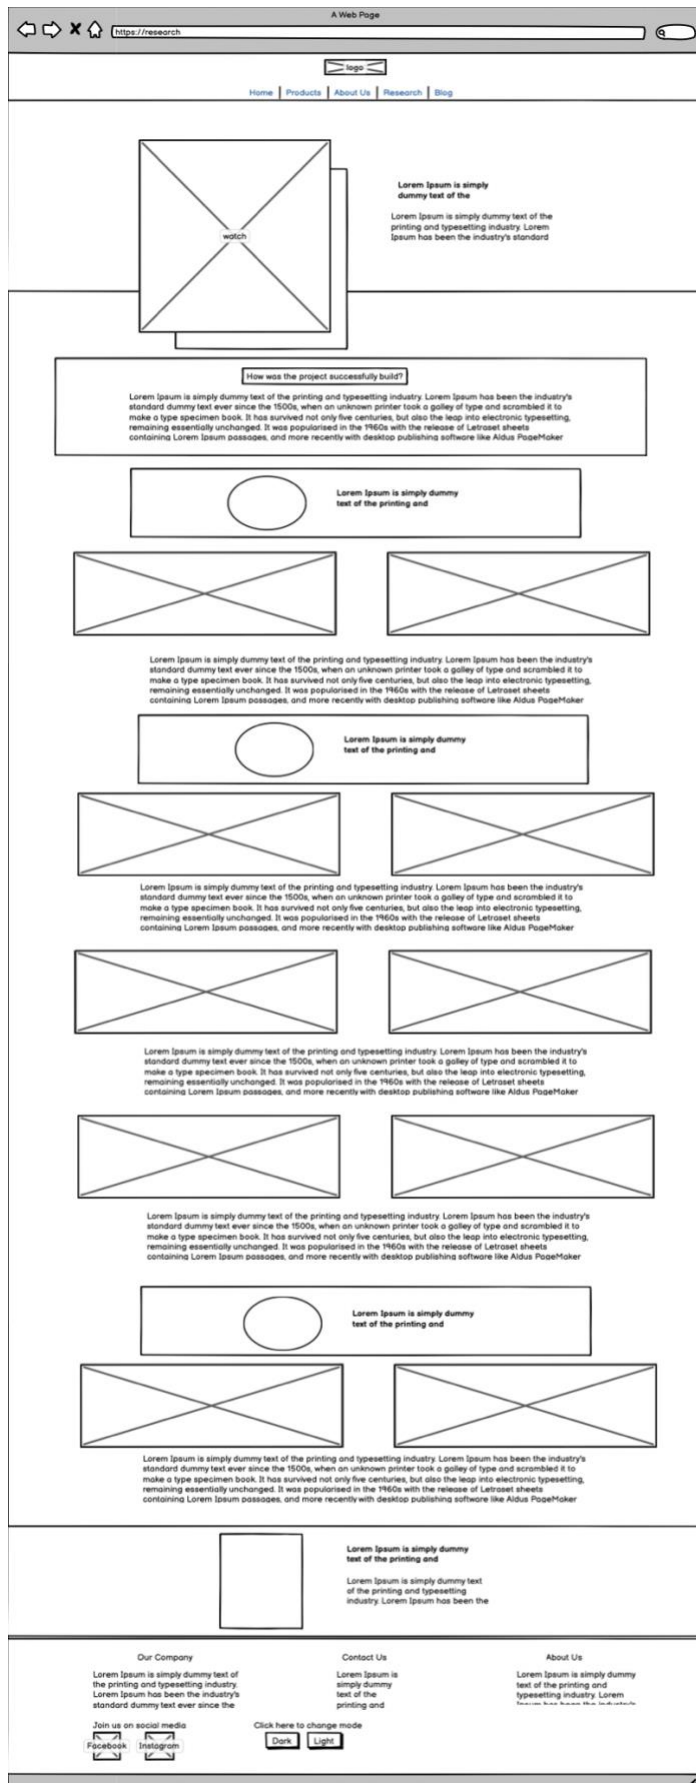

Figure XVIII - Wireframe of Research Page

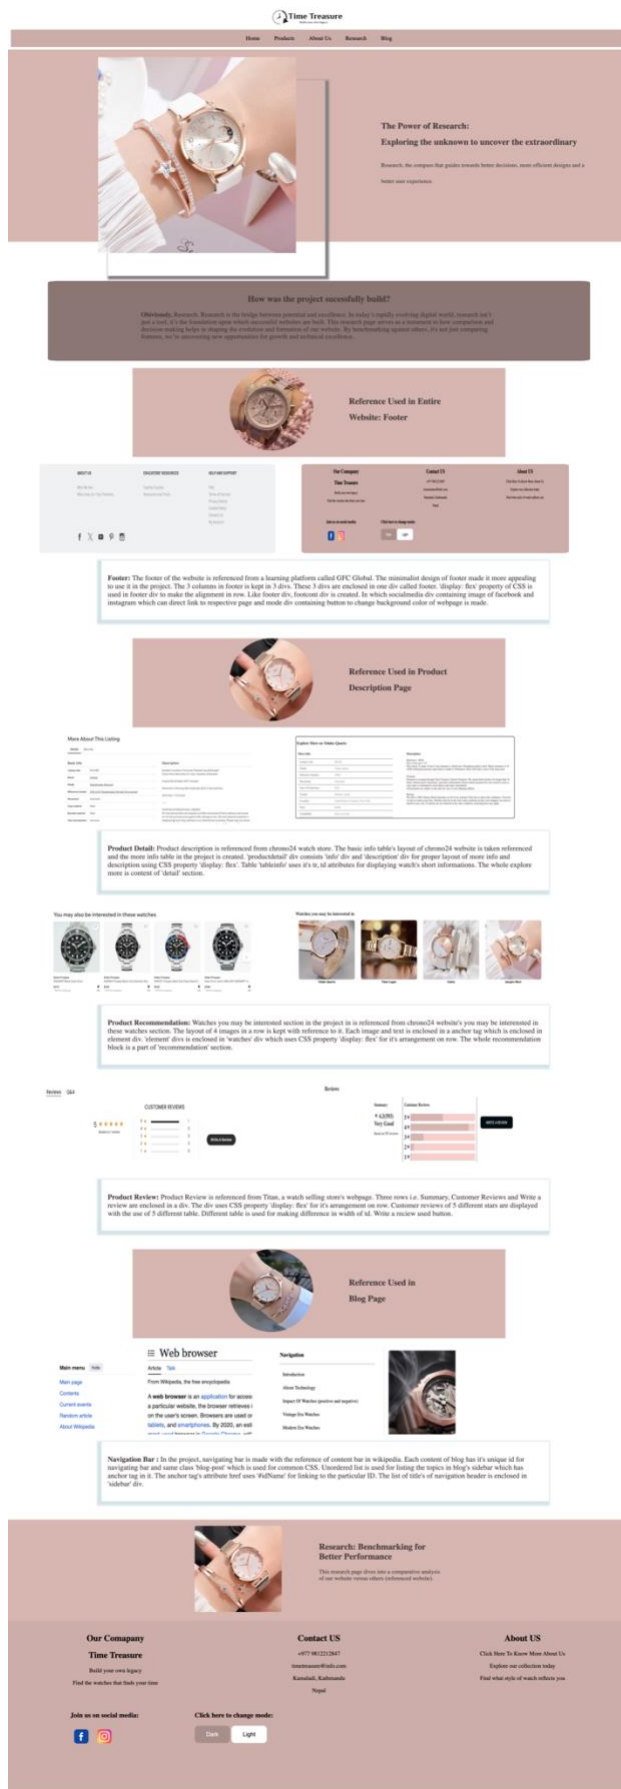

Figure XIX - Research Page

2.4.6. About Us Page

The main section of the "About Us" page is divided into 3 parts: a description of Time Treasure, team members introduction and a feedback form. The first part introduces information about the website. Then, a part displays profile of team members which provides a link to their individual portfolios. Each team member is represented by a circular image with a name and title below it which is structured within a flexbox container.

The final part of the main section includes a feedback form, where users can submit their thoughts on Time Treasure's services. This form uses basic form elements such as text inputs, radio buttons, a dropdown and a textarea for feedback. In the JavaScript part, the `validateForm()` function is used to ensure that all required fields (name, email, and feedback) must be filled out before the form can be submitted successfully. If any required field is left blank, an alert prompts the user to complete it; otherwise, a thank-you message is displayed.

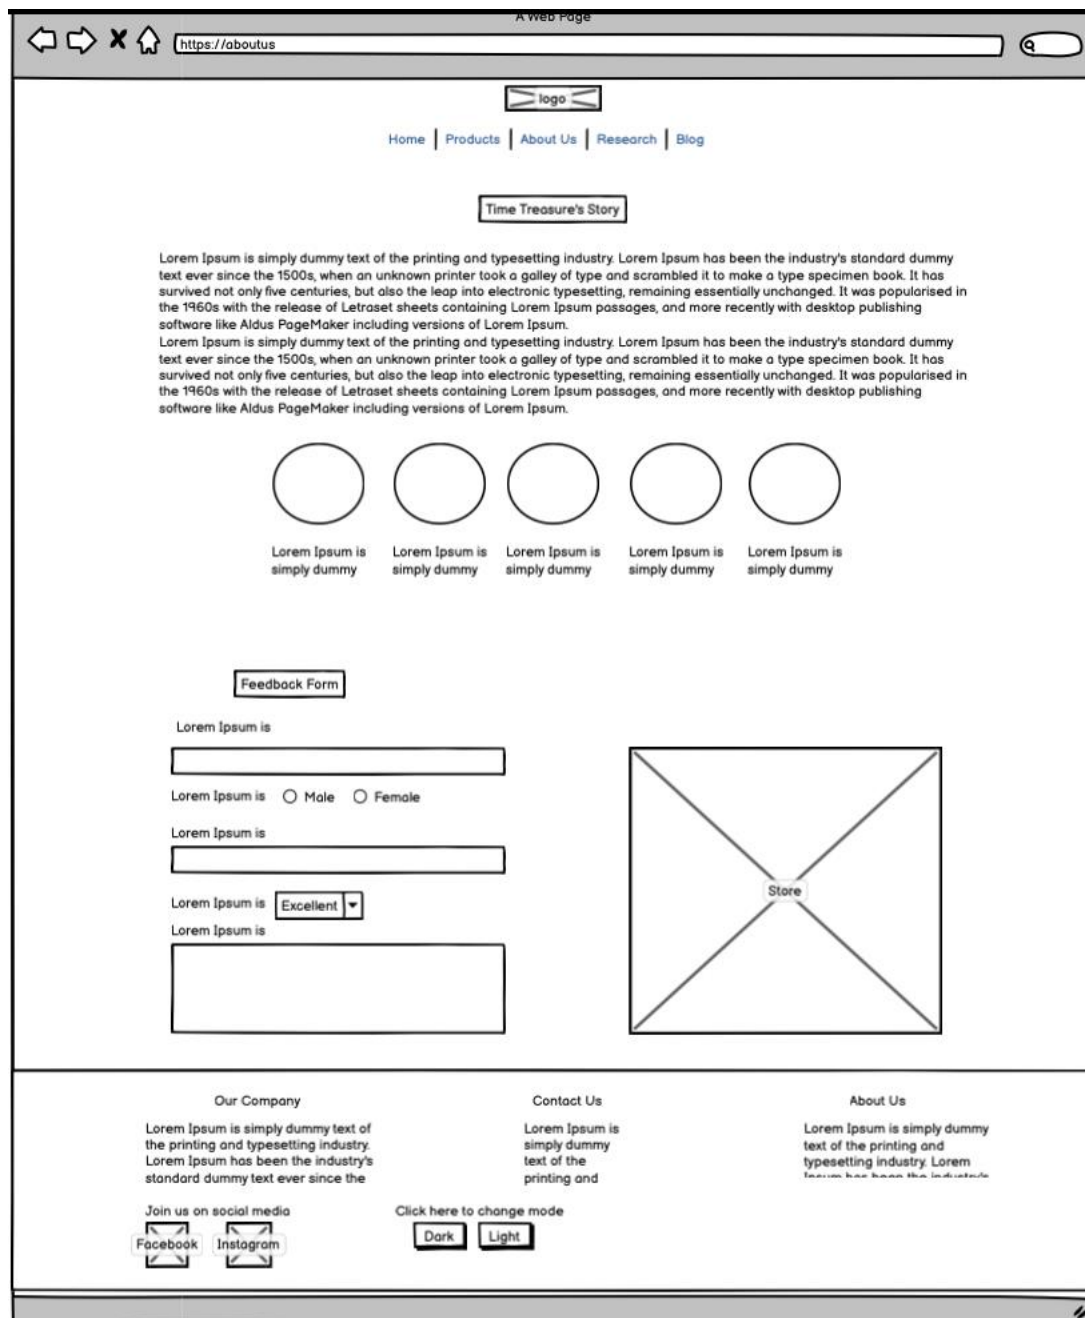

Figure XX - Wireframe of About Us Page

Time Treasure's Story

Time Treasure is a proficient aesthetic watch store which had originated in the prideful year of 1990 A.D. We have been active in the watch industry for over 30 years and now are one of the most successful and influential watch sellers in the entire country. In the recent years we have also started buying watches from our customers either be it a private seller or a commercial seller. We happily welcome all seller and all kind of aesthetic women's watches be it modern styled watches or antiyue or classic collector watches. We are excited to buy all kinds of watches provided to by the seller and ready to buy it in a reasonable price.

Figure XXI - About Us Page

2.4.7. Blog Page

In main section, there's a scrolling text section created with the `<div class="scrolling-text">` tag, where a message is scrolled across the screen using the `<marquee>` tag. The main content is wrapped in the `<div class="main-container">` tag. This section contains the sidebar `<div class="sidebar">`, which has a list of links for quick navigation to different topics. The sidebar content is wrapped in an unordered list `<ul>`, with each list item `<li>` representing a section like "Introduction", "Technology" or "Impact of Watches."

The main body of the content is placed under the `<div class="blog-section">` tag. Inside this section, each blog post is wrapped in the `<div class="blog-post">` tag, where an image `<img>` is included alongside the textual content contained within `<div class="content">`. Each post uses an `<h2>` tag for the title and a `<p>` tag for paragraphs. This structure continues throughout the various blog sections, with each having its own ID (e.g., `id="introduction"`, `id="technology"`, etc.) for easy navigation.

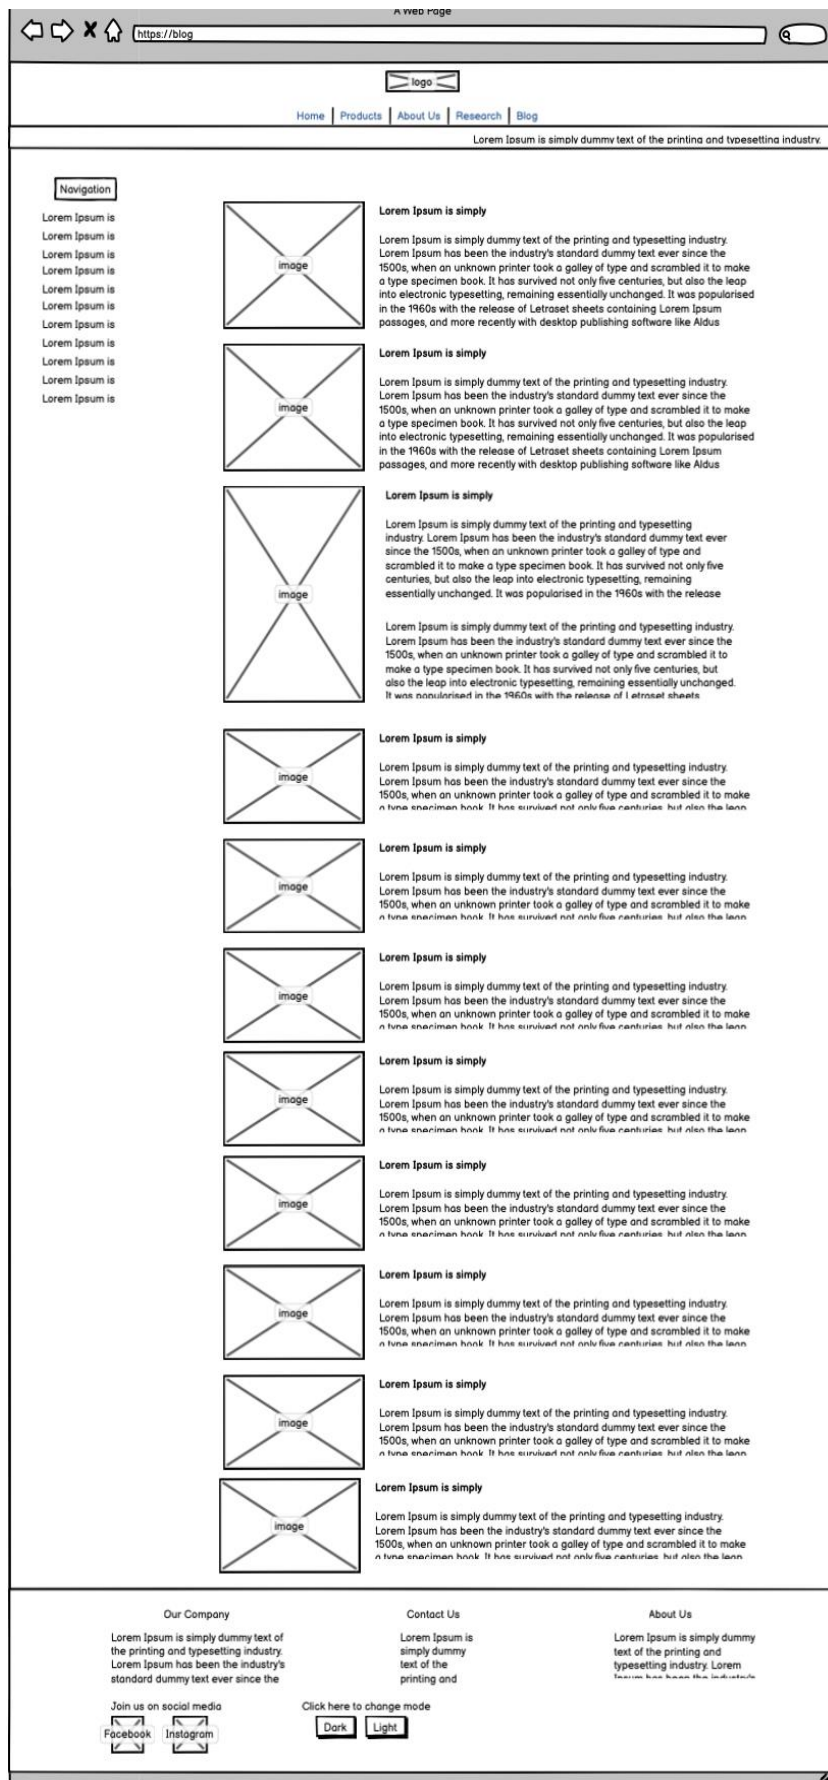

Figure XXII - Wireframe of Blog Page

2.4.8. Portfolio Page

The main section of portfolio document consists of a section which uses divs inside it for implementation of design. There is a `<div class="portfolio">` that divides the content into two columns: one for team members's photo (using `<div class="pp">`) and one for a brief introduction about the team member (using `<div class="aboutme">`). The portfolio div focuses on presenting team member's portfolio. The aboutme div includes a greeting, information about team member's academic background, roles, and contributions for the project, as well as additional personal details. The image and text is displayed side by side using the CSS property 'display: flex property' for alignment in row. It allows for a clean and easy-to-read structure for the users.

3. Testing

3.1. Test 1: Nav Hover Effect

Objective	Verify that the background colour, colour and cursor of a navigation link changes correctly when the user hovers over it with a mouse.
Action	Step 1: Navigate the cursor to the navigation bar. Step 2: Hover the navigation cursor over a specific navigation link (eg.Home)
Expected Result	The background colour of navigated link should change to gray, colour should change to white and cursor should change to hand cursor.
Actual Result	The background colour of navigated link changed to gray, colour changed to white and cursor changed to hand cursor.
Test	Pass

Table 1 - Test 1: Nav Hover Effect

Figure XXX - Navigation Bar before hovering

Figure XXXI - Navigation Bar while hovering

3.2. Test 2: Internal Link

Objective	Verify that the internal link correctly navigates to the intended target page.
Action	Step 1: Navigate to the page containing internal link (i.e. Home Page) Step 2: Click on the specific element having internal link (i.e. a link to product description page).
Expected Result	The browser should navigate to the specific product description page.
Actual Result	The browser correctly navigated to the the specified product description page.
Test	Pass

Table 2 - Test 2: Internal Link

Screenshots:

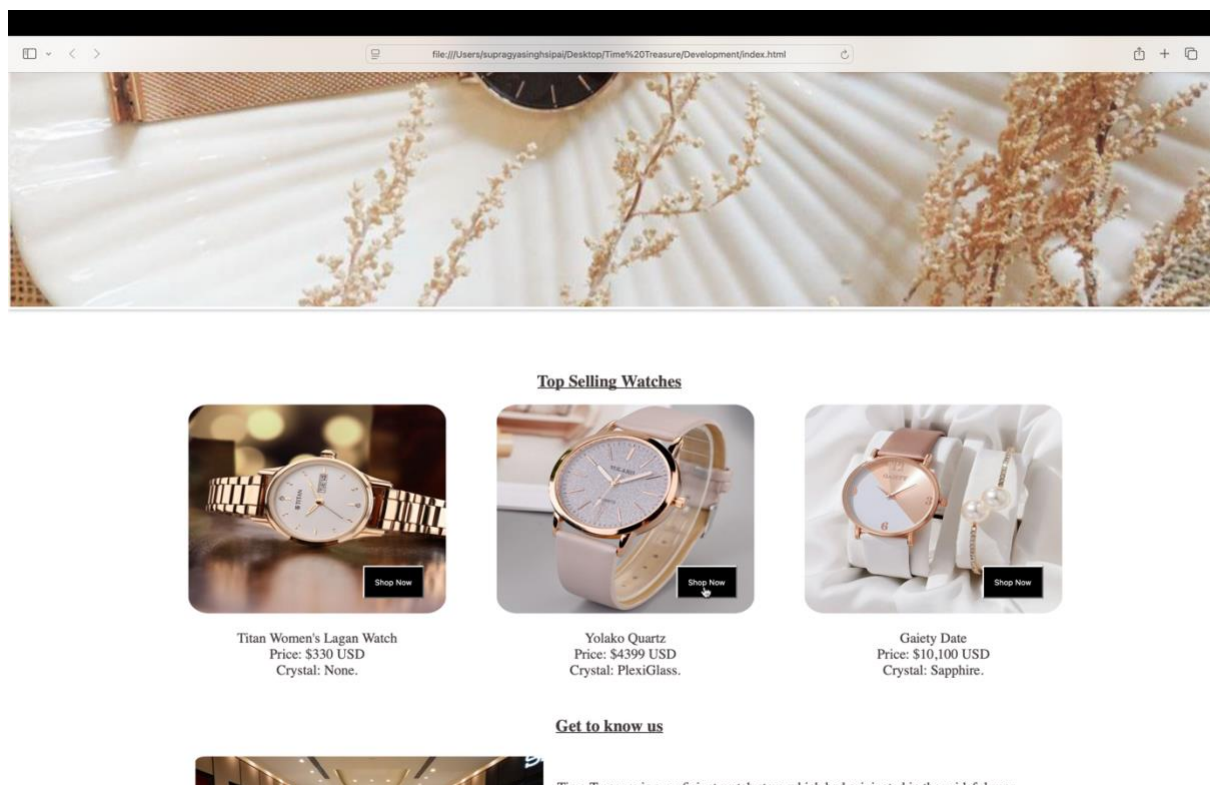

Figure XXXII - Page containing internal link

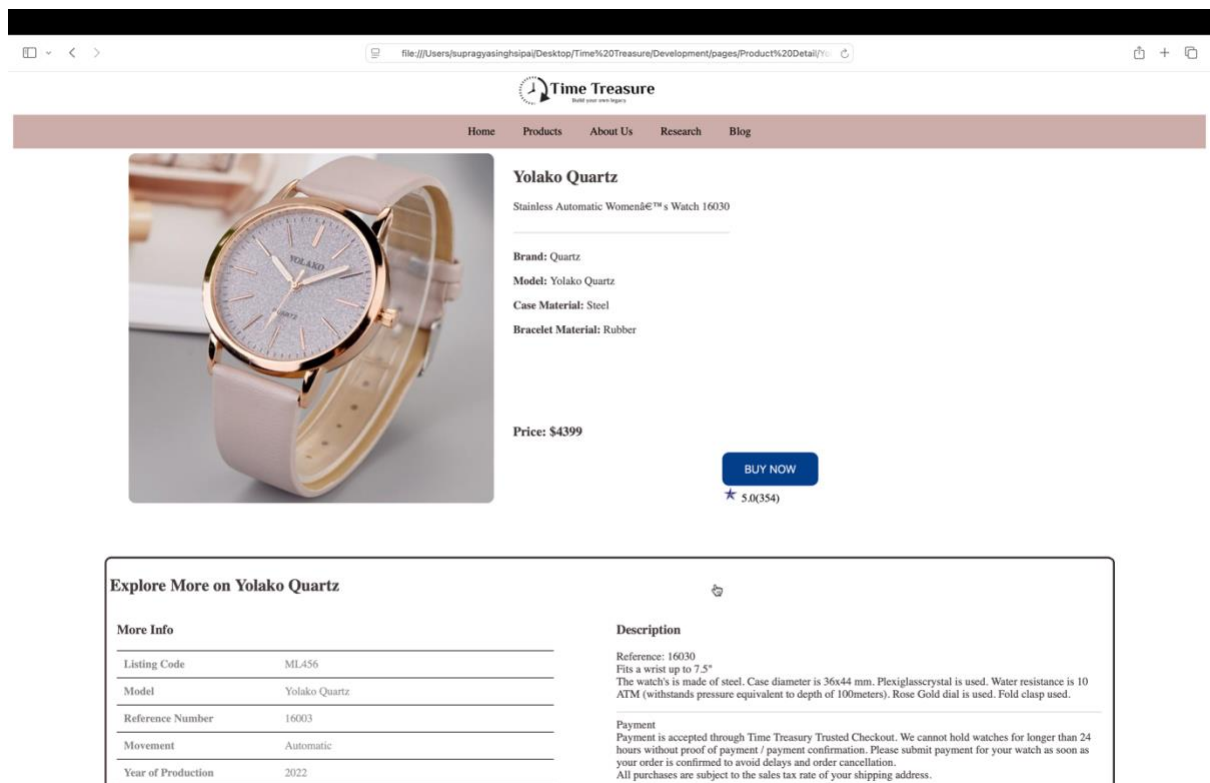

Figure XXXIII - Page navigated from internal link

3.3. Test 3: External Link

Objective	Verify that the external link correctly navigates to the intended target page.
Action	Step 1: Navigate to the page containing external link (i.e. Research Page) Step 2: Click on the specific element having external link.
Expected Result	The browser should navigate to the specific external website.
Actual Result	The browser correctly navigated to the the specified external website
Test	Pass

Table 3 - Test 3: External Link

Screenshots:

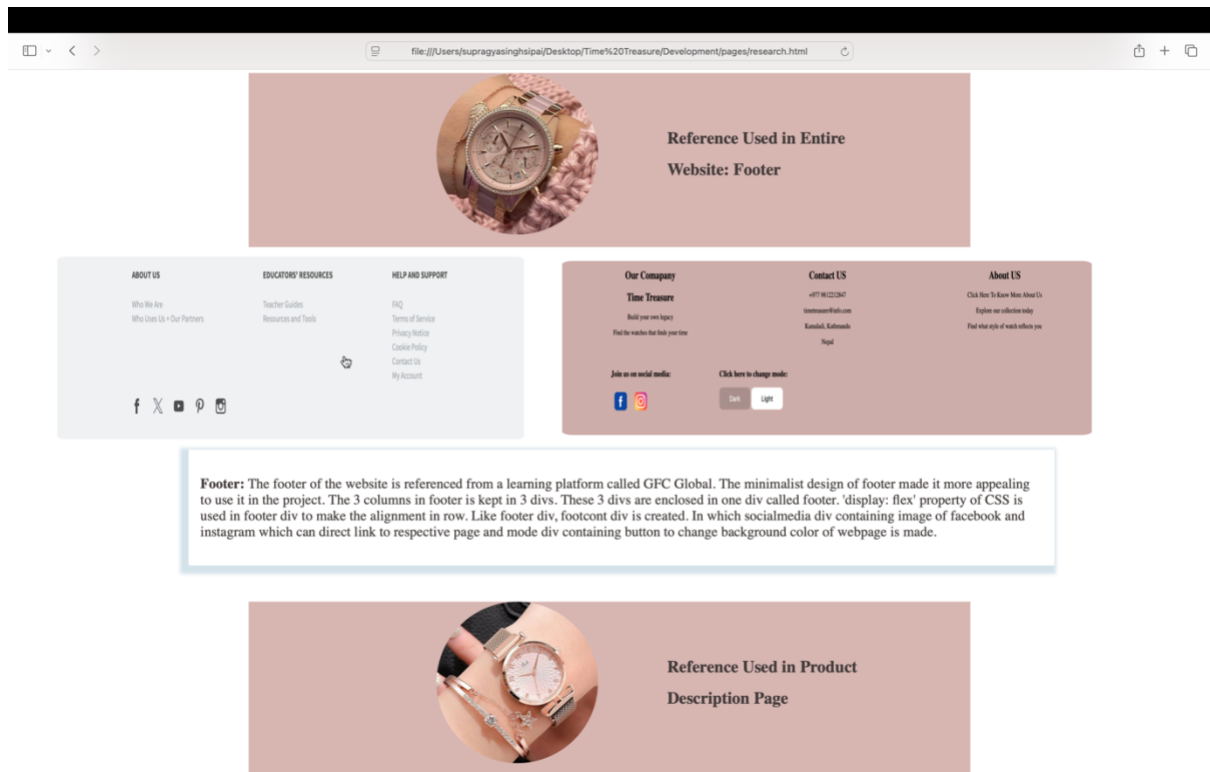

Figure XXXIV - Page containing External Link

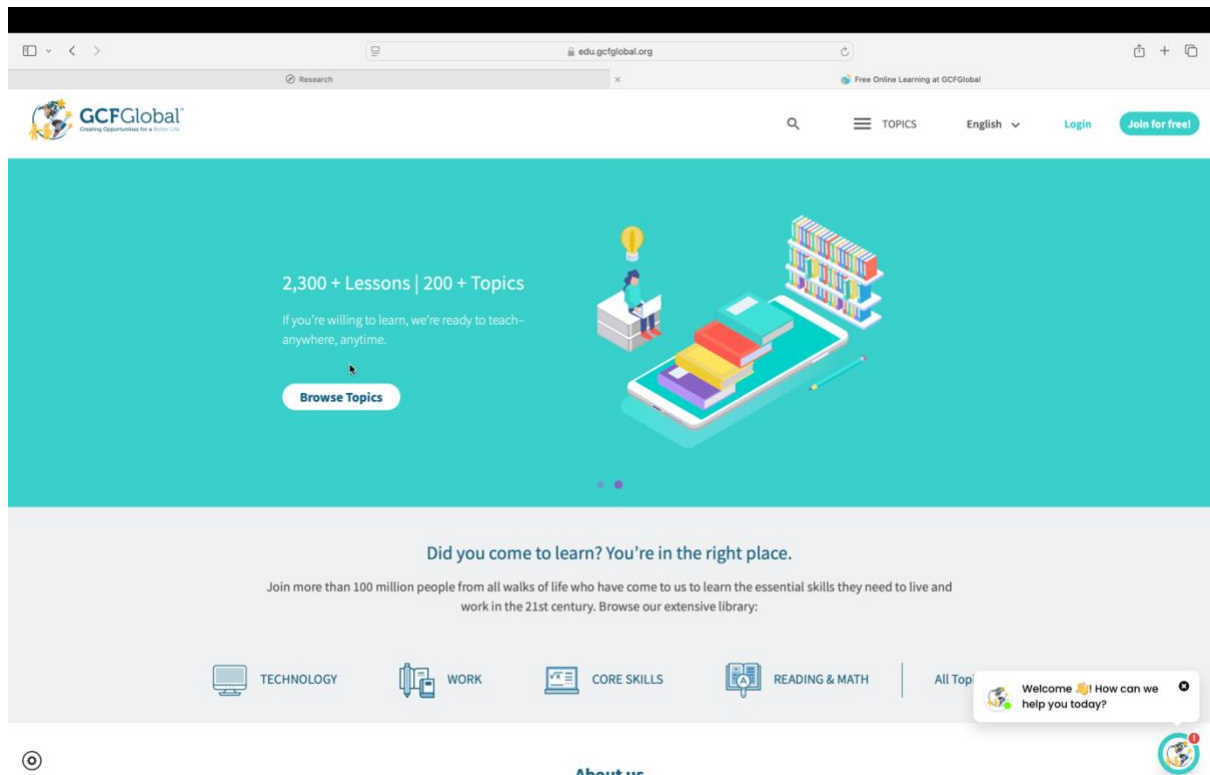

Figure XXXV - Page Navigated from External Link

3.4. Test 4: Image Slider

Objective	Verify that image slider is working and image is changing
Action	Step 1: Navigate to the page where image slider is used (i.e. Home page)
Expected Result	Image should change after 2 second of interval.
Actual Result	Image changed in each 2 second of interval.
Test	Pass

Table 4 - Test 4: Image Slider

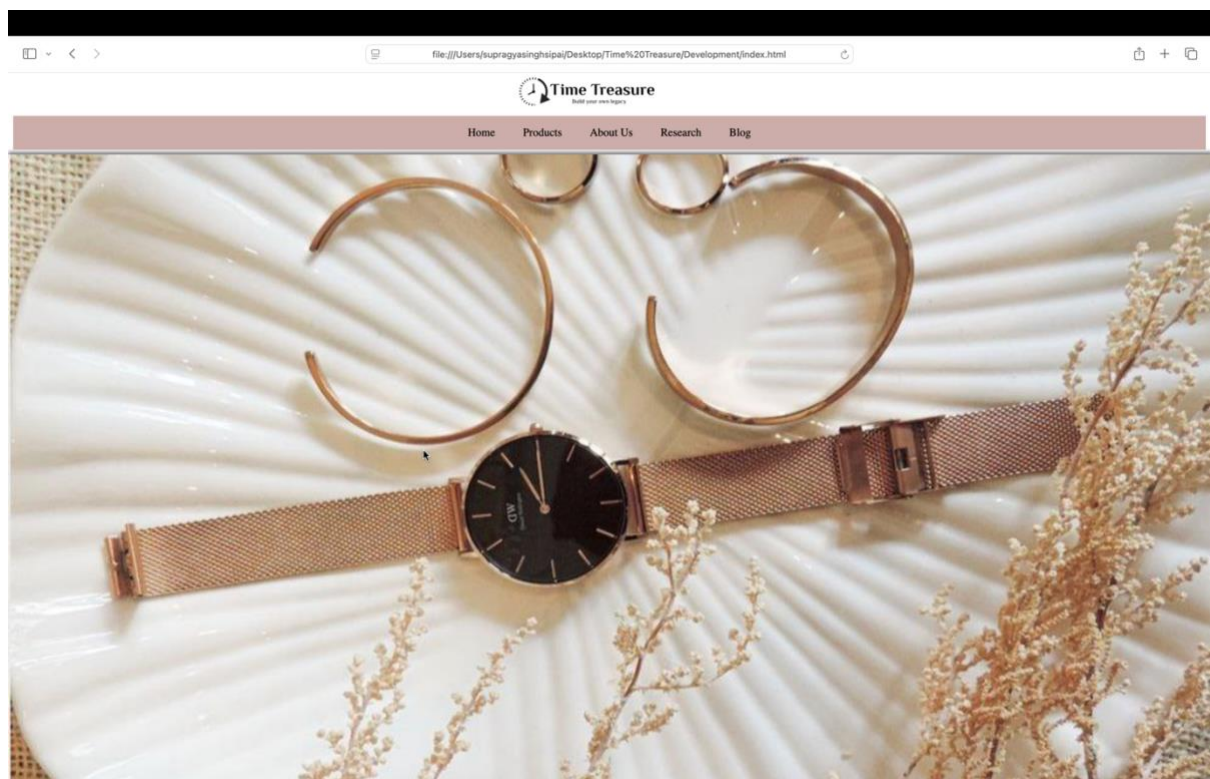

Figure XXXVI - Image Slider 1

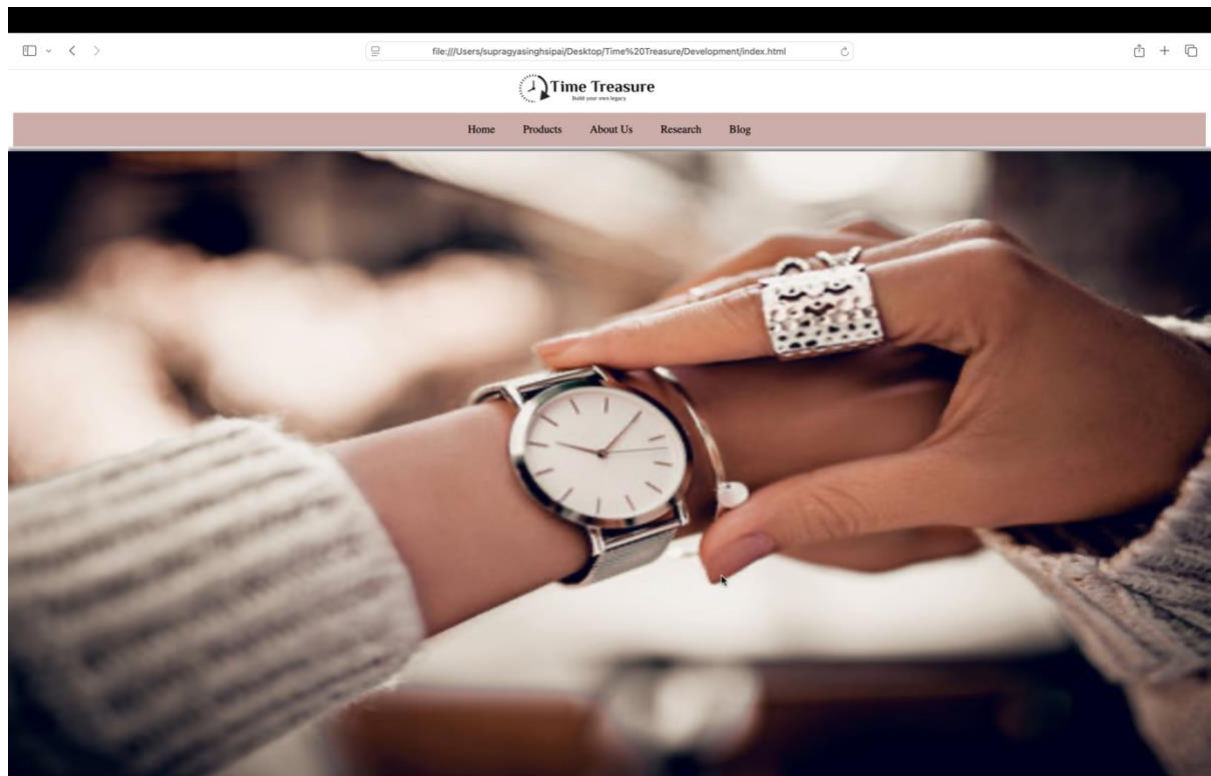

Figure XXXVII - Image Slider 2

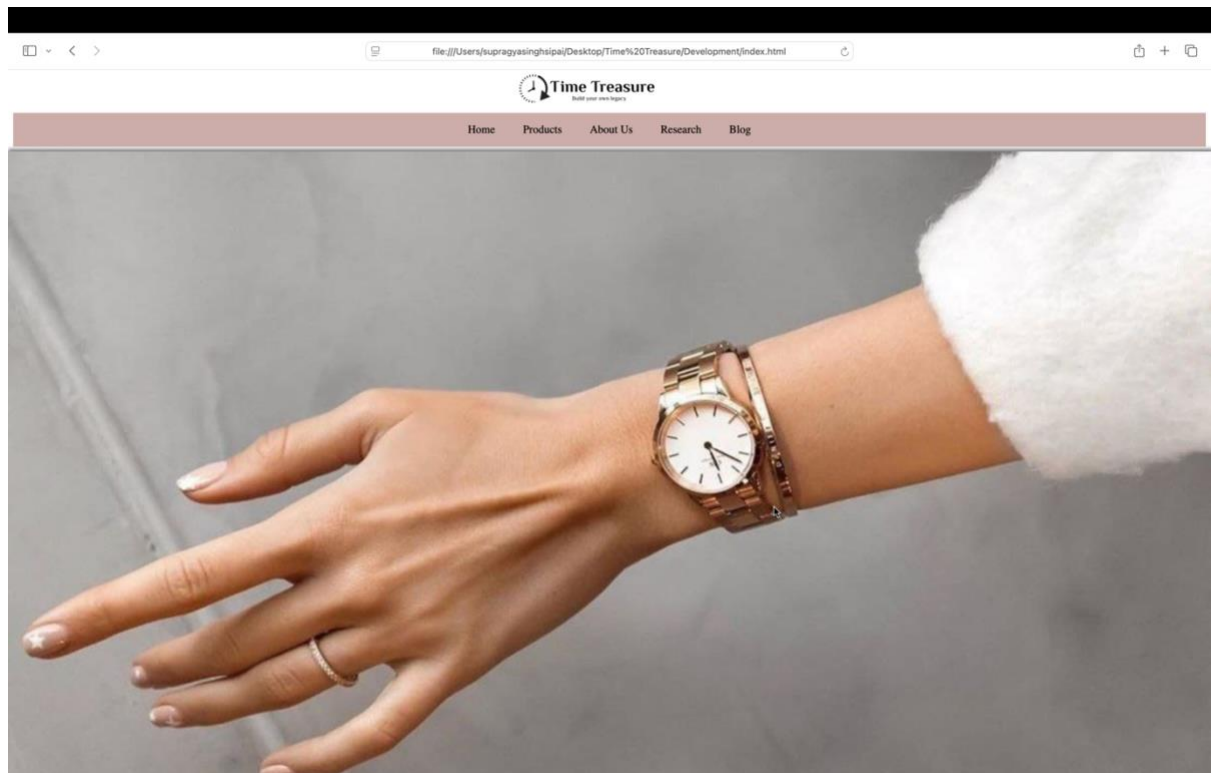

Figure XXXVIII - Image Slider 3

3.5. Test 5: Image Toggle Effect

Objective	Verify that clicking on an image toggles it to a different image, and back again on re-clicking the image.
Action	Step 1: Navigate to the webpage having image with toggler effect. Step 2: Click the image.
Expected Result	The image should change to the alternate image and on clicking again it should revert the image back to the original.
Actual Result	The image changed to the alternate image after the first click and reverted to the original image after the second click.
Test	Pass

Table 5 - Test 5: Image Toggle Effect

Screenshots:

Figure XXXIX - Toggle Image 1

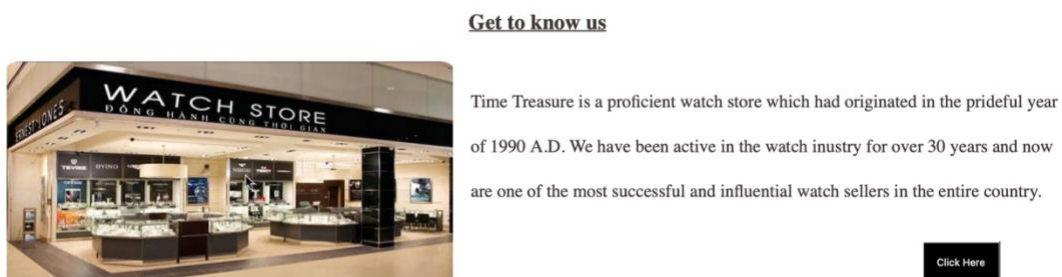

Figure XL - Toggle Image 2

3.6. Test 6: Change Body Background Colour

Objective	Verify that background colour of body changes when button is clicked.
Action	Step 1: Navigate to the button which changes button colour. Step 2: Click the button.
Expected Result	The body background colour should change to different colour and text.
Actual Result	The body background colour changed to different colour.
Test	Pass

Table 6 - Test 6: Change Body Background Colour

Screenshots:

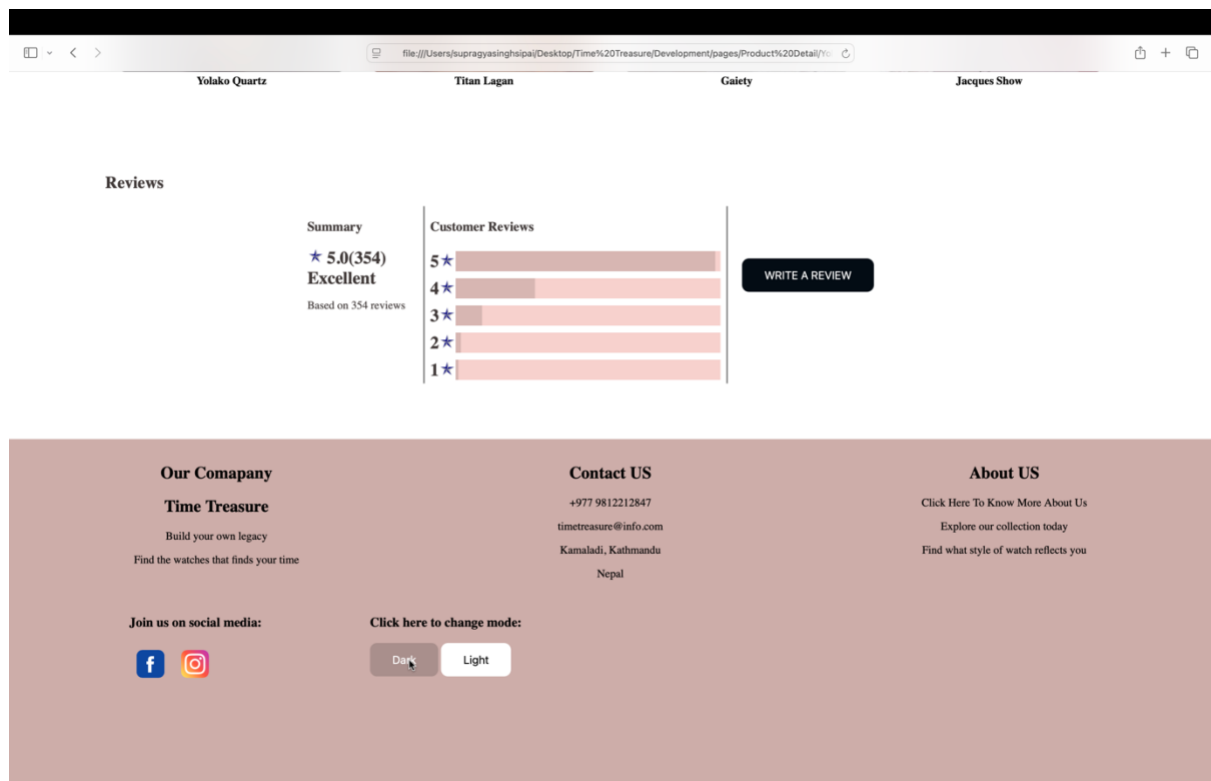

Figure XLI - Body with initial bg color

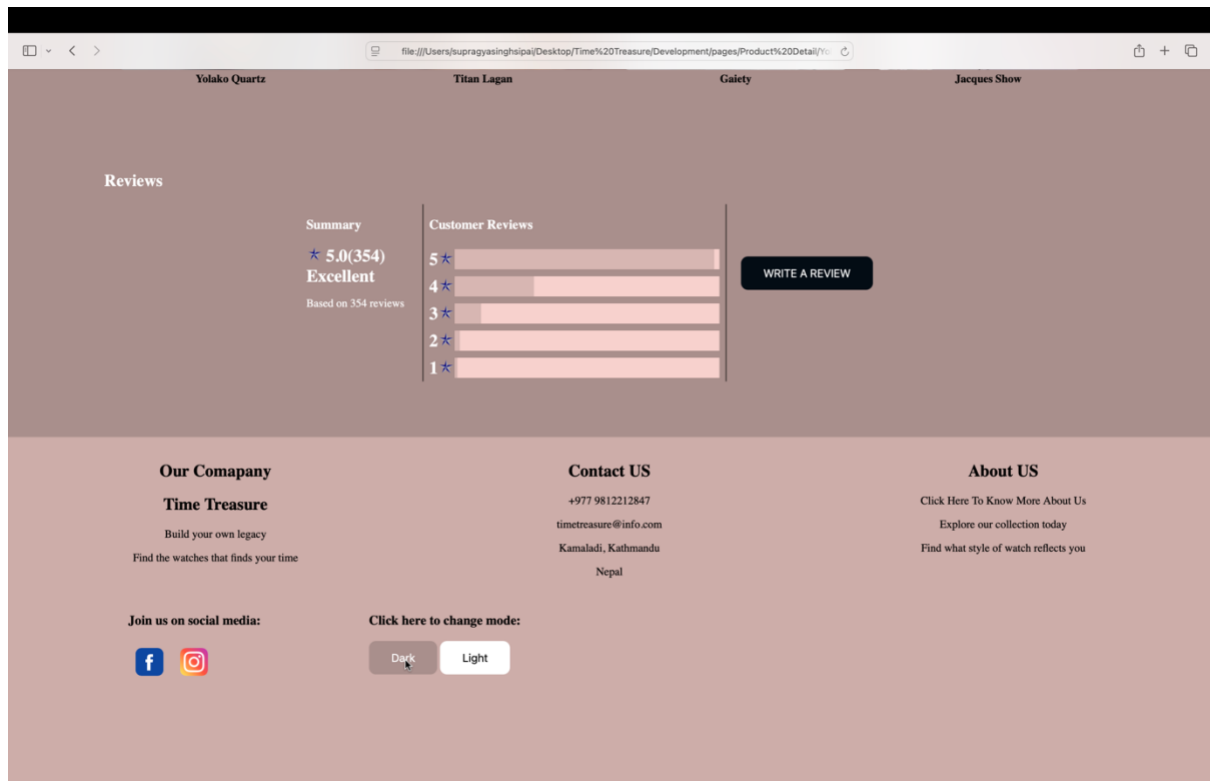

Figure XLII - Body with Dark theme color

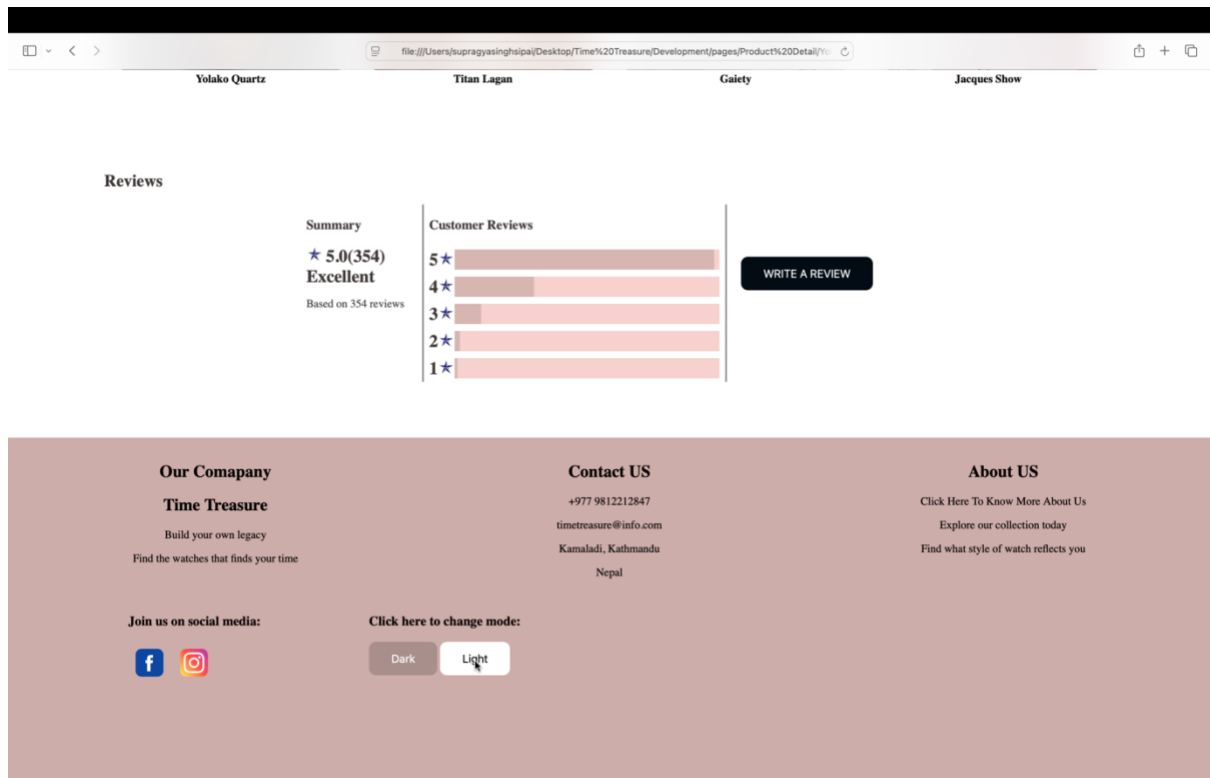

Figure XLIII - Body with original bg color(white)

3.7. Test 7: Form Validation (Feedback Form)

Objective	Verify that the feedback form is working or not.
Action	Step 1: Navigate to About Us page. Step 2: Find Feedback form. Step 3: Try different possibilities of answer that can be made.
Expected Result	The required field should be filled for thanks alert to appear and if required field is not filled, it should alert that the specific field is not filled.
Actual Result	The required field was filled when thanks alert appeared and when required field is not filled, it showed alert message that the specific field was not filled.
Test	Pass

4. Conclusion

This project includes formation of webpage from complete scratch. The development process started with deciding the tools to be used while making website which are VS code and Balsamiq. The foremost thing done while starting of the project is selecting color palette for the website. Then, HTML code is written. According to the necessity, for designing and layout, CSS are added. To make the website dynamic and little responsive, JavaScript is then embedded in the code.

In the process of creating design and implementation through development using HTML, CSS and JavaScript, it has many things to learn and practice. The more the practice was, it sharpened the skill of using these tools and also the implementation of tags, attribute, property, function and so on. The project also enhanced the creativity level. The project helped in growth of individual development. Competency in designing website to development of different design using HTML and CSS has increased. Applying JavaScript has made features more interactive, dynamic and has enhanced User Experience.

In conclusion, while developing e-commerce website using HTML, CSS and JavaScript, it enhanced the ability of working on web development. The project helped us to know more on the fundamentals of web technology. Throughout the project, skills regarding HTML, CSS and JavaScript boosted up. The project made fundamental base for the frontend development. Many basic terms used in web technology got familiar. We learned basic steps required for the development of any website. The project made solid foundation for web development and web designing. Development of this project was a learning opportunity which helped in enhancement of creativity.

    <div class="about">
      <h1 align="center"><ins>Time Treasure's Story</ins></h1>
      <p align="center">Time Treasure is a proficient aesthetic watch store
which had originated in the prideful year of
        1990
        A.D. We have been active in the watch inustry for over 30 years and
now are one of the most
        successful and
        influential watch sellers in the entire country. In the recent years we
have also started buying
        watches
        from our customers either be it a private seller or a commercial seller.
We happily welcome all
        seller and
        all kind of aesthetic women's watches be it mordern styled watches or
antiyue or classic collector watches. We are
        excited to
        buy all kinds of watches provided to by the seller and ready to buy it in a
reasonable price. </p>

    <div class="blog-post" id="introduction">
        
        <div class="content">
            <h2>Introduction</h2>
            <p>Historically, watches have served as more than just timepieces;
they are symbols of
                artistry, fashion, and creativity. With its long history, the watch
business has
                progressed from complex mechanical designs to modern
smartwatches that combine
                convenience and technology. Luxury
                timepieces are still made by well-known manufacturers, and
contemporary inventions
                satisfy the
                rising demand for both style and practicality. Watches are a
classic item that showcases
                individual flair as well as the newest developments in design and
technology, even as
                the industry evolves.</p> <br>
            <p>Elegant works of art that have been created over generations,
watch are far more than
                just basic instruments for displaying time. The watch business
regularly tests the
                limits of innovation and design, starting with the first mechanical
timepieces and
                continuing with the emergence of quartz mechanisms and, most
recently, the advanced
                smartwatches of today. In addition to being useful timepieces,
watch are also

```

fashionable garments that showcase individuality, prestige, and even modern technology.

Watches have turned into a necessary component of daily life, whether they are high-end

timepieces with exquisite craftsmanship or smartwatches loaded with the newest

technologies. From traditional designs to cutting-edge, tech-driven advancements, they

have everything for everyone, which contributes to their enduring appeal. The world of

watches continues to evolve as new functions and materials are introduced.</p>

</div>

</div>

<div class="blog-post" id="technology">

<div class="content">

<h2>About Technology</h2>

<p>Numerous industries have seen significant transformations due to technology, and the

watch

industry is no different. Watches have changed from being basic timepieces to

multipurpose

devices with the advent of smartwatches, artificial intelligence, and health monitors.

Things

like communication and fitness tracking are made possible by these advancements.</p>

<p>The watch industry has changed as a result of technology, which combines style,

innovation, and accuracy. Timekeeping has changed significantly throughout the years,

from traditional mechanical artistry to quartz accuracy and AI-powered wearables. With

features like wireless networking, GPS, and health tracking, modern watches are more

than simply accessories. Automation and artificial intelligence (AI) improve design and

production, while novel substances like sapphire crystal, titanium, and ceramic increase

endurance. The watch business maintains a flawless balance between heritage and

contemporary innovation as technology develops, ensuring that timepieces are both

practical and stylish.

</p>

</div>

</div>

<div class="blog-post" id="impact">

<div class="content">

<h2>Impact of Watches</h2>

<p>By fusing contemporary technology with design, watches have completely changed how we

perceive

time. Although they provide sophistication and convenience, they can have both

beneficial

and

detrimental effects.</p>

<h3>Positive Impact</h3>

<p>- Making the time easily accessible, watches improve productivity.</p>

monitoring.</p>

<p>- Watches are regarded as classic investments that gain value over time.</p>

<p>- Daily routines gain structure and a sense of punctuality from watches.</p>

<h3>Negative Impact</h3>

<p>-Regular alerts from smartwatches might provide continual distractions.</p>

<p>-Luxurious timepieces have the potential to push consumption over usefulness.</p>

<p>-Overuse of wearable technology may result in less interpersonal encounters as users

become

overly preoccupied with the gadget.</p>

<p>-As smartphones replace watches in many time-related tasks, watches may become less

useful.

</p>

</div>

</div>

<div class="blog-post" id="vintage-era">

<div class="content">

<h2>Vintage Era Watches</h2>

<p> Usually made between the early 1900s and the 1970s, antique timepieces are prized for

their

classic quality and unique designs. In keeping with the fashions of their day, these

watches

frequently have distinctive structures, sophisticated displays, and mechanical movements. Vintage watches are prized for their unique qualities and the fine artistry that went into making them, in contrast to contemporary timepieces. They are still very popular among collectors and enthusiasts today because of their historical significance as well as the close connection they provide to a bygone period of watchmaking.</p>

</div>

</div>

<div class="blog-post" id="modern-era">

<div class="content">

<h2>Modern Era Watches</h2>

<p>Watches from the modern period combine state-of-the-art technology with traditional workmanship.

As quartz mechanisms gained popularity in the 1980s and 1990s, timepieces improved in

accuracy,

affordability, and design variety. Digital timepieces with sophisticated features like

multi-functions and lighted screens became popular at this time. For durability and

fashion,

brands adopted cutting-edge materials like ceramics and titanium. Automatic watches were

also

improved during this time, combining accuracy and mechanical artistry. In the end, the

contemporary era paved the way for the introduction of smartwatches, which provide both

classic

style and innovative functionality.</p>

</div>

</div>

<div class="blog-post" id="smart-age">

<div class="content">

<h2>Smart Age Watches</h2>

<p>Personal timekeeping enters a new era with smart age watches. In addition to telling the

time,

these sophisticated clocks have made conventional watches into multipurpose tools. With

features

like tracking your activity, health monitoring, real-time updates, and GPS navigation,

smartwatches allow technology to be easily incorporated into everyday life. These wrist

devices

offer unmatched ease as we continue into the digital era, enabling users to control

their

time,

health, and communications from the palm of their hands. They also showcase innovation.

</p>

</div>

</div>

<div class="blog-post" id="luxury">

```

<div class="content">
  <h2>Luxury Watches</h2>
  <p>Luxury wristwatches are a stylish fusion of revolutionary
technology and traditional
  style.
  Due
  to their frequent production limitations, these watches are
extremely uncommon and
  desirable.
  Watch companies push the limits of service with each creation,
producing one-of-a-kind
  complexities, beautiful trends, and distinctive looks. The finest
timepieces are an
  admiration
  of both form and function, from the careful polishing of metals to
the choice of rare
  materials
  like mother-of-pearl and titanium. They are not only timekeepers
for the smart
  collector,
  but
  also individual declarations of fashion, the ages, and unmatched
skill.</p>
```

```
</div>
</div>
<div class="blog-post" id="trends">
  
```

```
<div class="content">
  <h2>Trends In Watch Design</h2>
  <p>Minimalism is being embraced by watch designers, who are
increasingly choosing simple
  shapes
```

and subtle elegance. Classic styles are being recreated with contemporary elements, continuing the vintage revival trend. Due to their utility and appeal, hybrid watches—which combine smart technology with classic analog—are becoming more and more popular. With materials like recycled elements and sustainable leather becoming more widely used, there is also a growing market for eco-friendly timepieces. These patterns demonstrate how contemporary watches are moving toward sustainability, innovation, and individuality. </p>

</div>

</div>

<div class="blog-post" id="future">

<div class="content">

<h2>Future Of Watches</h2>

<p>Legacy and modernity will merge in timepieces of the future. With their AI-powered

capabilities, effortless connectivity, and improved health tracking, smartwatches will become necessary

everyday companions. While maintaining production, luxury timepieces will develop using

eco-friendly straps and recycled metals, among other sustainable aspects.

Personalization

will

become the primary priority, enabling consumers to alter functionalities and styles to

suit

their requirements. The way users feel may be improved by the broad use of biometric and

augmented reality capabilities. Essentially, timepieces of future generations will

strike a

balance between sustainability, creativity and trend, appealing to both conventional

watch

admirers and those who enjoy technology.</p>

</div>

</div>

<div class="blog-post" id="sales">

<div class="content">

<h2>Use Of Technology To Boost Watch Sales</h2>

<p>The world of watches has seen a revolution due to technological advances, which has

improved

marketing and changed how customers interact with brands. Geographical obstacles are no

longer

an obstacle because of today's e-commerce sites, and AI-powered tools personalize

purchasing

by suggesting items based on user interests. With features like augmented previews, which give users a realistic idea of how a watch might appear on their wrist, augmented reality has further improved online buying. Social media is essential to marketing because it allows companies to interact with their audience directly and set trends. In the tough watch industry, these developments not only increase sales but also open the door for new ideas and improved client connections.

</div>

</div>

<div class="blog-post" id="conclusion">

<div class="content">

<h2>Conclusion</h2>

<p>Overall, from their modest origins as basic timepieces, watches have advanced immensely.

Nowadays they stand for a fusion of artistry, technological advancement, and individual expression, and are far more than merely accessories. The watches business has changed over time to satisfy

the
demands of contemporary consumers, from the mechanical
wonders of the past to the
innovative
smartwatch of today's world. Watches have remained relevant in
a world that is
constantly
evolving, whether they are exhibiting luxury, functionality, or the
newest technological
capabilities. For decades yet to come, the classic attraction of
timepieces will
continue to
attract and fascinate as the industry adjusts to new
developments and ideas.</p>

<p>

Description

I am Supriya Pandey, a passionate and determined IT student with certifications in QA, Python

Django, and digital marketing. I have a strong analytical mindset and a keen interest in

technology, software development, and business strategies. My goal is to combine my technical

expertise with entrepreneurial skills to build a successful business of my own. With a vision of

creating something impactful, I am committed to continuous learning, innovation, and leadership.

My journey is not just about personal success but also about inspiring others to break barriers

and chase their ambitions fearlessly.

6.9. Appendix IX: External JavaScript

// External JS for Background Color Change

```
function Dark() {  
    // change document's bg color  
    document.body.style.backgroundColor = '#A98F8C';  
    // change document's color  
    document.body.style.color = 'white';  
}
```

```
function Light() {  
    // change document's bg color  
    document.body.style.backgroundColor = 'white';  
    // change document's color  
    document.body.style.color = '#413A39';  
}
```

// External JS of Product Description Page's Review

```
function review() {  
    // y stores value obtained from prompt  
    var y = prompt("Write a review:");  
    // alert message is given when y is not empty  
    if (y != "") {  
        alert("Thankyou for your valuable review")  
    }  
}
```

// JS for image toggling

```
function toggle() {  
    var p1 = document.getElementById('1');  
    var p2 = document.getElementById('2');  
  
    if (p1.style.display == "none") {  
        p1.style.display = "block";  
        p2.style.display = "none";  
    }  
  
    else {  
        p1.style.display = "none";  
        p2.style.display = "block";  
    }  
}
```

```
function toggle1() {  
    var p1 = document.getElementById('3');  
    var p2 = document.getElementById('4');
